### **Coursework & Assessment**

Risk management is the identification, assessment and prioritization of risks followed by coordinated and economical application of resources. The course identifies the need to minimize, monitor, and control the likelihood and/or impact of unfortunate events, and to maximize the realization of opportunities.

For the most part, these methods consist of the following elements, performed, more or less, in the following order:

- Communication and consultation
- Establish the content
- Identify the risks
- Analyse the risks
- Vulnerability management lifecycle

### **Career Options:**

The risk assessors role is an exciting career option, as you can assess risk in an array of different situations. This can be in the construction, government, council, or private organisations. The assessor role can be used to evaluate the risk, in relation to public safety.
